Free and Open Source Software, FOSS

Free/Libre and Open Source Software, FLOSS **自由開源**軟體

有一種情懷叫理念

開源的理念是自由

對某些人來說仍舊是如此…………

Three Virtues

According to Larry Wall⁽¹⁾, the original author of the Perl programming language, there are **three great virtues of a programmer**; Laziness, Impatience and Hubris

1. **Laziness**: The quality that makes you go to great effort to reduce overall energy expenditure. It makes you write labor-saving programs that other people will find useful and document what you wrote so you don't have to answer so many questions about it.
 2. **Impatience**: The anger you feel when the computer is being lazy. This makes you write programs that don't just react to your needs, but actually anticipate them. Or at least pretend to.
 3. **Hubris**: The quality that makes you write (and maintain) programs that other people won't want to say bad things about.
-

(1) Quoted from "Programming Perl", 2nd Edition, O'Reilly & Associates, 1996

三個美德

根據 Perl 程式語言的原作者 Larry Wall 的說法，軟體工程師有三個重要美德：懶惰、急躁，以及傲慢。

- 1、**懶惰**：這才能使你付出巨大努力以降低總體能量消耗。它可以讓你編寫省力的程式，其他人會覺得有用並記錄你寫的內容，所以你不必回答很多關於它的問題。
- 2、**急躁**：你在電腦緩慢時感到的憤怒。這使您編寫的程序不僅能反應您的需求，而且能夠實現預期。或者至少假裝（實現預期）。
- 3、**傲慢**：這才能使你編寫（維護）讓其他人不會想說壞話的程式。

Laziness is a virtue

懶惰其實是一種重要**美德**

因為這樣的人不會做真的無謂或無聊的事情…

FOSS 應該怎麼做企業管理？

企業找到自己和社群**都舒服**的互動方式

Due Diligence

Other than the original advertisement picture and trademark of the IRIS,
2019 CC0, Lucien C.H. Lin, No Rights Reserved for the Photos.

企業合規商用開源軟體三大工作要項：

- 1、對程式源碼的提供範圍進行釐清
- 2、開發過程讓工程人員依流程編撰開源軟體清單
- 3、過濾排除非開源的第三方程式碼

要做好自由開源合規

1. 程式源碼的適時適當提供為第一要務
2. 提供授權條款全文並進行適當揭露
3. 尊重原專案相關權利聲明及免責聲明

2014-09-30- 降低開源授權爭訟風險的三大要點

Free and Open Source License Compatibility Chart

To see if software can be combined, start at their respective licenses and find a common box that can be reached by arrows from each licenses. Other possibilities exist if you are only using software as a binary or can invoke some exception provided by specific projects on a case-by-case basis. This chart was derived from the original work of David Wheeler and derivative work of HHMI(Janelia Farm FlyEM Project). It can be modified under a Creative Commons Attribution-ShareAlike 3.0 Unported License.

<http://www.dwheeler.com/essays/floss-license-slide.html>

<http://janelia-flyem.github.io/licenses.html>

自由開源軟體授權相容圖

要查看軟體是否能夠結合，請從個別的授權條款開始並找到一個可以通過該許可證的箭頭到達的方框。

其他(相容的)可能性是存在的，如果您僅是使用軟體作為函式庫，或是援引特定項目根據具體情況而得採的例外條件。

這張圖表由 林誠夏(Lucien C.H. Lin) 中譯自於David Wheeler的原創作品及HHMI(Janelia Farm FlyEM Project)的衍生作品，

它可以在 CC授權 姓名標示-相同方式分享 3.0 未本地化版本授權(CC BY-SA 3.0)下被改作。

FlyEM Software Dependencies

There are a number of applications used within Janelia Farm's FlyEM project. Below is a table showing possible software dependencies and the open source license they use. When a license has different wording than one of the popular licenses, we note similar licenses in the Notes area and usually provide a link to a web page that describes the license in more detail. A simple explanation of the compatibility of open source licenses can be found [here](#).

Software	License	Notes
atlas 3.10.0	BSD	
blist 1.3.4	BSD	Link
boost 1.51.0	Boost Software License	Very similar to BSD and MIT
cppunit 1.12.1	LGPLv2.1	
fftw 3.3.2	GPLv2+	Option to purchase non-free

- [7 References](#)
- [8 External links](#)

History [edit]

D-Link Corporation changed its name from Datex Systems Inc. in 1994, when it went public and when it became the first networking company on the [Taiwan Stock Exchange](#). It is now publicly traded on the TSEC and NSE stock exchanges.

In 1988, Datex Systems Inc. released the industry's first peer-to-peer LANSmart Network Operating System^[2], able to run concurrently with early networking systems such as Novell's [NetWare](#) and [TCP/IP](#) which most small network operating systems could not do at the time.

In 2007, it was the leading networking company in the small to medium business (SMB) segment worldwide with 21.9% market share.^[3] In March 2008, it became the market leader in Wi-Fi product shipments worldwide, with 33% of the total market.^[4] In 2007, the company was featured in the "Info Tech 100", a listing of the world's best IT companies. It was also ranked as the 9th best IT company in the world for shareholder returns by [BusinessWeek](#).^[5] In the same year, D-Link was released one of the first Wi-Fi

D-Link Corporation
友訊科技股份有限公司
D-Link Systems, Inc.

D-Link

Type	Public
Traded as	TWSE: 2332
Industry	Networking equipment
Founded	March 1986; 33 years ago (as Datex Systems Inc.) 1994 (as D-Link Corporation)
Headquarters	Taipei, Taiwan
Key people	Lori Hu (Chairwoman)
Products	Routers, DSL/Cable Gateways, Switches, Wireless access points, Storage and security IP cameras
Revenue	▼ NT\$ 26,614 million (2015)
Number of employees	2,722 (2015)
Website	dlink.com

Server misuse [\[edit\]](#)

In 2006, D-Link was accused of [NTP vandalism](#), when it was found that its routers were sending time requests to a small [NTP server](#) in Denmark, incurring thousands of dollars of costs to its operator. D-Link initially refused to accept responsibility.^[20] Later, D-link products were found also to be abusing other time servers, including some operated by the US military and [NASA](#).^[21]

GPL violation [\[edit\]](#)

On 6 September 2006, the [gpl-violations.org](#) project prevailed in court litigation against D-Link Germany GmbH regarding D-Link's alleged inappropriate and copyright infringing use of parts of the [Linux kernel](#).^[22]

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership

The OpenChain Project makes open source licensing simple and consistent in the supply chain

The [OpenChain Specification](#) identifies the key requirements of a quality open source compliance program. [OpenChain Conformance](#) allows organizations to show they meet these requirements. The [OpenChain Curriculum](#) supports this process by providing extensive reference material for effective open source training and management. The result is that open source license compliance becomes more predictable, understandable and efficient for all participants in the software supply chain.

LINUX FOUNDATION COLLABORATIVE PROJECTS

 SPDX

SPDX License List

The SPDX License List is a list of commonly found licenses and exceptions used in free and open source and other collaborative software or documentation. The purpose of the SPDX License List is to enable easy and efficient identification of such licenses and exceptions in an SPDX document, in source files or elsewhere. The SPDX License List includes a standardized short identifier, full name, vetted license text including matching guidelines markup as appropriate, and a canonical permanent URL for each license and exception.

- [License Exceptions](#): The list of commonly found exceptions to free and open source licenses, which can be used with the [License Expression](#) operator, "WITH" to create a license with an exception.
- [Master Files](#): The HTML pages you see here are generated from the master files for the SPDX License List.
- [Data Files](#): Machine readable files describing all of the licenses and license exceptions.
- [Overview](#): General information about the SPDX License List, including principles for inclusion of a license and an explanation of the fields contained on the list.
- [IDs](#): Learn more about using short-form license identifiers in your source code.
- [Matching Guidelines](#): Guidelines for what constitutes a license match to the SPDX License List. The license text on the HTML pages here will display omitable text in blue and replaceable text in red (see Guideline #2 for more information).
- [Request New License](#): Instructions for proposing a license or exception be added to the SPDX License List.

Redis Licensing Overview

- Redis is open sourced, available under the [3-Clause-BSD](#) license.
- [Redis Modules](#), which are add-ons on top of Redis, are created by people in the community and bear different licenses according to each creator's choice.
- Redis Modules created by Redis Labs (e.g. [RedisSearch](#), [RedisGraph](#), [RedisJSON](#), [RedisML](#), [RedisBloom](#)) are licensed under the [Redis Source Available License \(RSAL\)](#). Read more about RSAL below.
- [Redis Enterprise](#) is closed source and requires a commercial license from Redis Labs. Read more [here](#).

Commons Clause.

“Commons Clause” License Condition v1.0

The Software is provided to you by the Licensor under the License, as defined below, subject to the following condition.

Without limiting other conditions in the License, the grant of rights under the License will not include, and the License does not grant to you, the right to Sell the Software.

For purposes of the foregoing, "Sell" means practicing any or all of the rights granted to you under the License to provide to third parties, for a fee or other consideration (including without limitation fees for hosting or consulting/ support services related to the Software), a product or service whose value derives, entirely or substantially, from the functionality of the Software. Any license notice or attribution required by the License must

About the Redis Source Available License (RSAL)

RSAL is a software license created by Redis Labs for certain Redis Modules running on top of open source Redis. RSAL grants equivalent rights to permissive open source licenses for the vast majority of users. With RSAL, developers can use the software, modify the source code, integrate it with an application, and use, distribute or sell the application. The only restriction is that the application cannot be a database, a caching engine, a stream processing engine, a search engine, an indexing engine or an ML/DL/AI serving engine.

[VIEW LICENSE](#)

FAQs

What limitations does RSAL impose on my use of Redis Labs' Modules?

Software protected by RSAL is designed to be used as part of an application. We want to help and encourage people to develop their own applications, but RSAL differentiates between a “database product” and all other applications. RSAL defines a database product as any of the following products or services: (a) databases, (b) caching engines, (c) stream processing engines, (d) search engines, (e) indexing engines or (f) ML/DL/AI serving engines.

If your application built with RSAL-protected software is NOT a database product, RSAL defines it as “your application,” and you can:

MongoDB is released under the [GNU Affero General Public License](#). This Free Software Foundation license is fairly new, and thus we wanted to talk about how this license differs from GPL.

Our goal with using AGPL is to preserve the concept of [copyleft](#) with MongoDB. With traditional [GPL](#), copyleft was associated with the concept of distribution of software. The problem is that nowadays, distribution of software is rare: things tend to run in the cloud. AGPL fixes this “loophole” in GPL by saying that if you use the software over a network, you are bound by the copyleft. Other than that, the license is virtually the same as GPL v3.

To say this another way: if you modify the core database source code, the goal is that you

Embedthis Software Licensing

Embedthis products are commercially licensed, royalty-free with complete source code, documentation and samples. The software may be licensed for a single product, a product family or a custom field of endeavor. We will work with you to tailor the license if required to meet your specific needs.

We provide free product evaluations under an Open Source GPL License so you may thoroughly test and understand the software before licensing.

Commercial License Benefits

The Embedthis royalty-free commercial license provides you with the following benefits:

- The right to develop and modify the software to embed in products
- The ability to redistribute your products with the software
- Simple royalty-free, one-time purchase options
- Software maintenance for updates and upgrades

confluent

Product Cloud Developers Blog Docs Download

Jay Kreps

December 14, 2018

Print

We're changing the license for some of the components of Confluent Platform from Apache 2.0 to the [Confluent Community License](#). This new license allows you to freely download, modify, and redistribute the code (very much like Apache 2.0 does), but it does not allow you to provide the software as a SaaS offering.

What this means is that, for example, you can use KSQL however you see fit as an ingredient in your own products or services, whether those products are delivered as software or as SaaS, but you cannot create a KSQL-as-a-service offering. We'll still be doing all development out in the open and accepting pull requests and feature suggestions. For those who aren't commercial cloud providers, i.e. 99.9999% of the users of these projects, this adds no meaningful restriction on what they can do with the software, while allowing us to continue investing heavily in its creation.

一般問題

問：什麼是 Amazon DocumentDB (與 MongoDB 相容)？

Amazon DocumentDB (與 MongoDB 相容) 是一種快速、可擴展、高度可用且全受管的文件資料庫服務，可支援 MongoDB 工作負載。開發人員可以和現在一樣使用相同的 MongoDB 應用程式程式碼、驅動程式和工具，執行、管理和擴展 Amazon DocumentDB 上的工作負載，並享有提升的效能、可擴展性和可用性，無須擔心管理基本基礎設施。客戶可以免費使用 AWS Database Migration Service (DMS) 六個月的時間，輕鬆地將其現場部署或 Amazon Elastic Compute Cloud (EC2) MongoDB 資料庫移轉至 Amazon DocumentDB，而且幾乎沒有停機時間。使用 Amazon DocumentDB 無須前期投資，客戶只需根據使用的容量支付相關費用即可。
