臺灣主權AI訓練語料庫
(Beta版)

關於語料庫 | 申請須知 | 語料資料集 | 授權條款 | 合作夥伴 | 登入/註冊

臺灣主權AI訓練語料授權條款-第1版

前言：

為促進以人為本的人工智慧（AI）研發與應用，增進公眾利益、提升在地文化價值，並促進自然語料的永續發展，特訂立本授權條款，以加速並提倡相關資料之流通。

一、名詞定義

1. **授權人**：指具備合法權利的個人或單位，依據本授權條款提供其所管理之語料資料予被授權人，以協助被授權人在被明確同意的基礎下，使用該等語料資料於人工智慧的訓練與學習。

https://taic.moda.gov.tw/content/license

三、課予義務

(一)使用者利用依本條款提供之開放資料，視為同意遵守本條款之各項規定，並應以尊重第三人著作人格權之方式利用之。

(二)使用者利用依本條款提供之開放資料，及後續之衍生物，應以符合附件所示「顯名聲明」要求之方式，明確標示原資料提供機關之相關聲明；未盡顯名標示義務者，視為自始未取得開放資料之授權。

四、版本更新及授權轉換

(一)本條款如有修正，依舊條款提供之開放資料，於新條款公告時，使用者得選擇採用新條款利用。但原資料提供機關，於提供開放資料時，已訂明其使用之特定版本條款者，不在此限。

(二)本條款與「創用CC授權 姓名標示 4.0 國際版本」相容，使用者依本條款利用開放資料，如後續以「創用CC授權 姓名標示 4.0 國際版本」規定之方式利用，視為符合本條款之規定。

五、停止提供

有下列情形之一者，各資料提供機關得停止全部或一部開放資料之提供，使用者不得向資料提供機關請求任何賠償或補償：

1. 因情事變更或其他正當事由，致各資料提供機關評估繼續提供該開放資料供公眾使用，已不符合公共利益之要求。

https://data.gov.tw/license

臺灣主權AI訓練語料庫(Beta版)

::: 關於平台 語料資料集 消息專區 合作夥伴 提供語料 登入/註冊

三、標示義務

1.除非依法免除或經授權人另行同意，於語料資料之應用型態為模型、權重等工具或輸出平臺之產出時，被授權人應標示語料平臺，就該語料資料提供之相關識別資訊，例如資料集名稱、版本號、資料集提供者、發布年份、資料集申請頁面或官方網站、或其他經授權人指定之格式化引用資訊，以及指出係依「臺灣主權AI訓練語料授權條款-第1版 (Taiwan Sovereign AI Training Data License–Version 1.0)」發布之狀態，此一授權資訊之呈現，得標示授權條款正式全稱，例如：「臺灣主權AI訓練語料授權條款-1.0－有效期間至2030年」、「臺灣主權AI訓練語料授權條款-1.0－有效期間為永久」、"SAITD-Lic-Taiwan-1.0-Valid until 2030"、"SAITD-Lic-Taiwan-1.0-Valid in perpetuity"。

2.鑒於人工智慧訓練涉及多元來源之語料資料混用，授權人同意就本授權條款發布之語料資料，進行識別資訊標示時，被授權人僅需就語料平臺提供之語料資料庫或資料集名稱，及其他相關識別資訊進行標示，毋須就本授權語料資料內含個別素材，如語文、音樂、美術、攝影、圖形、視聽、錄音等客體進行逐項標示。

3.於語料資料之應用型態為程式碼、文件等型態之輸出時，相關標示義務得視媒介或載體之限制，採更為簡化之方式為之。例如採人工智慧軟體模型或服務平臺進行輸出執行，後續輸出成果於公開演播或展示時，應註明其為「人工智慧生成產出」等資訊，以彰顯資訊或可能偏離事實或應另行查找權威資訊以資確認。

四、使用政策

1.被授權人應就語料資料之使用成果，包括人工智慧訓練之產出與輸出，於合理範圍內設置適當防護機制，以避

GEMA sues for fair compensation

GEMA is the first collecting society worldwide to file a lawsuit against a provider of generative artificial intelligence (AI) systems that have used copyright-protected musical works to train their systems without having acquired licenses.

January 2025: Lawsuit against Suno AI
Suno AI generates songs (audio files) using generative AI. The results that Suno AI delivers are in some cases so similar to well-known songs that they infringe the authors copyright.

November 2024: Lawsuit against Open AI (ChatGPT)
GEMA accuses Open AI of reproducing protected song lyrics by German authors in its tool ChatGPT without having remunerated the authors of the works used.

Copyright and Artificial Intelligence

Since launching an initiative in early 2023, the Copyright Office has been examining the copyright law and policy issues raised by artificial intelligence (AI), including the scope of copyright in AI-generated works and the use of copyrighted materials in AI training. After hosting public listening sessions and webinars, the Office published a notice of inquiry in the *Federal Register* in August

Report on Copyright and Artificial Intelligence

Copyright and Artificial Intelligence analyzes copyright law and policy issues raised by artificial intelligence (AI). This Report is being issued in several Parts. Part 1 was published on July 31, 2024, and addresses the topic of digital replicas. Part 2 was published on January 29, 2025, and addresses the copyrightability of outputs created using generative AI. On May 9, 2025, the Office released a pre-publication version of Part 3 in response to congressional inquiries and expressions of interest from stakeholders. A final version of Part 3 will be published in the future, without any substantive changes expected in the analysis or conclusions.

推動AI創新與著作權保護 三部會共邀內容與AI業者召開交流會議

推動數位政府

為因應AI發展對資料流通與創新利用需求，並同時兼顧內容產業的著作權益，數位發展部、文化部與經濟部智慧財產局於本（10）月16日首度共同召開權利人意見交流會議，邀集國內內容產業代表與公協會、AI應用端業者，以及相關領域專家等，就AI發展與著作權保護相關議題交換意見。期盼藉由利害關係人之間的討論交流，以及跨部會合作與產業對話，作為後續政策推動與法制研議的重要參考。

本次交流會議由數發部侯宜秀政務次長、文化部徐宜君常務次長，與智慧局廖承威局長共同主持，聽取內容端與使用端的實務經驗及關切議題，就AI訓練所需資料的利用與授權、著作權益保障、優質語料的整備與產業合作等議題進行交流。

數發部說明，AI研發業者需要大量高品質語料，內容創作者則關切作品的利用情形與合理回饋；如何兼顧雙方需求，是政府推動資料治理的重要課題。為尋求AI 創新與著作權保護的衡平發展，智慧局與數發部分別研訂《生成式人工智慧著作權指引》草案與《促進資料創新利用發展條例》草案，期盼透過本次會議的溝通，作為後續政策研議與滾動調整的基礎。

文化部徐次長表示，文化內容創作者與使用者其實有共同的目標，尋求能夠創新利用並確保創作者權益、維持創作動能的共好機制。文化部長期支援國內文化內容創作，期待透過跨部會與產業持續對話，進一步討論內容創作者參與AI發展的合作

衡平AI創新與著作權保護之推動方向

115年10月

數位發展部

衡平AI創新與著作權保護之發展方向(3/3)

合理衡平著作權人與利用者權益

推動「使用報酬給付機制」，適度擴大法院量刑裁量空間，回應技術發展需求

著作財產權人

AI研發利用者

不適用著作權法第七章

限符合下列情形之一：

1、著作係於市場交易流通所取得之合法重製物

2、已公開揭露利用著作之資訊並訂定使用報酬給付機制

送著作權專責機關備查

排除條款

- **明示退出**：資料取得時，業經著作財產權人以適當方式，明示其著作不提供人工智慧開發、訓練、測試或驗證之利用。
- **影響市場**：產出結果顯著影響著作之潛在市場或現有價值。
- **無防範措施**：未採取有效措施，防範人工智慧之產出侵害他人著作財產權或著作人格權。

制度方向

- ✓ 為人工智慧之開發、訓練、測試或驗證，因資料彙整或分析之必要，犯著作權法第七章之罪者，得減輕或免除其刑。
- ✓ 著作係於市場交易流通所取得之合法重製物，或已公開揭露利用著作之資訊並訂定使用報酬給付機制者，不適用著作權法第七章規定；使用報酬給付機制，應送著作權專責機關備查。

Dataset Card GPT-NL Public Corpus

The GPT-NL Public Corpus is the largest permissively licensed Dutch-language resource available for large language model pretraining. It consists of 29 curated collections totaling over 524 billion tokens, including 36B Dutch, 207B English, 232B code, and 48B German/Danish tokens. All data is sourced under permissive licensing and redistributed under a CC-BY license. For more details please refer to our Public Corpus article.

Dataset Description

- **Curated by:** GPT-NL Team
- **Language(s) (NLP):** Dutch, English, German, Danish, Frisian, Code
- **License:** CC-BY. If you use (part of) the Public Corpus, please cite like stated below. *Note*: this is the license of the corpus. However, all datapoints have specific licenses attributed in the metadata field. These licenses are based on the license of the original source dataset that was curated or augmented for the purpose of creating the GPT-NL public corpus. Author names are given for collections with a CC-BY license. For Code datasets, we link the original Github link where the original license conditions can be found.

signals
.cc-metadata.yml
LICENSE
README.md

CC signals

In this initial proposal, we have drafted four "signal elements" for public feedback. For this phase of prototyping, we have proposed four particular combinations of signal elements that would serve as the suite of CC signals. The four proposed signals are:

- Credit
- Credit + Direct Contribution
- Credit + Ecosystem Contribution
- Credit + Open

The files with the initial proposed text for each signal are:

Name	Directory
CC Credit 0.1	`signals/cr/0.1/`
CC Credit Direct Contribution 0.1	`signals/cr-dc/0.1/`
CC Credit Ecosystem 0.1	`signals/cr-ec/0.1/`
CC Credit Open 0.1	`signals/cr-op/0.1/`

How CC signals work

每一種信號都包含內容得被機器採用的條件。也就是說，AI 開發者必須滿足這些條件才能使用內容進行 AI 開發。所有條件的設計都是為了在相當規模機器採用裡，推動有意義且可實踐的互惠性。我們的初步提案包括以下信號要素：

名譽標示：你必須依據使用方式、手段與情境，提供適宜的名譽標示。

直接回饋： 你必須向「聲明方」提供金錢或相類支持，用於該方資產的開發與維護；此支持應基於善意評估，考量你對資產的使用情況以及你的獲利手段。

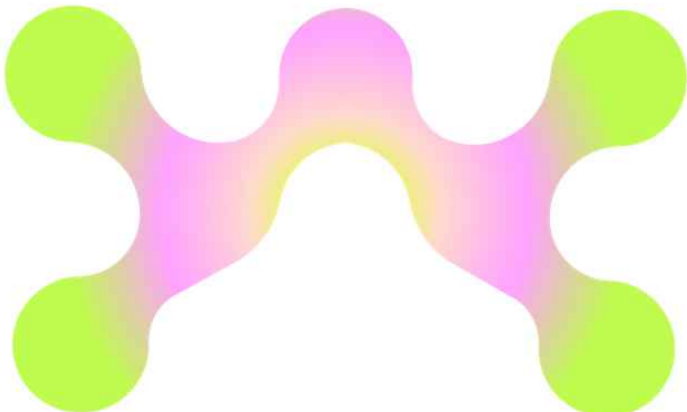

生態系回饋： 你必須對你所受益的生態系統提供金錢或相類支持，基於善意評估，考量你對資產的使用情況以及你的獲利手段。

保持開放： 使用(內容)的 AI 系統必須是開放的。例如，必須符合「模型開發框架 (Model Openness Framework, MOF) 的 II 級或 I 級，或符合「開源AI定義 (Open Source AI Definition, OSAID)」。

專訪

誰在使用台大師生的課程資料？專訪台大教學平台：如何避免AI資料授權爭議重演

November 28, 2025

臺灣大學的教學平台「NTU COOL」於今年（2025）9 月 25 日更新其《用戶協議》，新增條款要求使用者授權平台將其上傳的課程素材、作業、討論區內容等，經「去識別化」處理後，應用於輔助教學之人工智慧模型（AI model）的研發與後續開源計畫。若使用者不同意授權資料，個人教學平台頁面便遭凍結，導致學生無法上傳課程作業，形同變相強制同意，引發臺大學生強烈不滿，質疑此舉侵犯隱私與個人資料自主權。

【人工智慧訓練與退出機制】

甲方未行使其人工智慧訓練退出地位，而點擊本條款之同意區塊時，視為同意將其所提供之素材，非專屬、無償授權乙方轉提供予校內其他單位（下稱收受單位）用於人工智慧之學術研究與技術開發，包括但不限於模型訓練、權重生成、程式碼或文件整備等。

前述素材經收受單位重新調整、編輯處理後之訓練資料，於與原素材未達實質近似，且不產生市場替代效果之前提下，得由該單位採「CC授權-姓名標示-非商業性 4.0 國際」或其後更新版本之授權條款發布、分享，相關姓名標示得簡化為「NTU COOL AI 訓練語料-功能說明-v.版本號」，或採其他更具流通效率之標記方式為之。

為增進公眾利益、提升學研資料於人工智慧領域之應用價值，乙方就校內單位提案釋明，明確符合《人工智慧基本法》所訂各項原則之指標性訓練資料，並依循提案時校方就人工智慧研究與應用之各項指導文件與審驗流程者，得額外同意該單位採行《臺灣主權AI訓練語料授權條款》與「CC授權-姓名標示-

Open Weights and
American AI Leadership

July 24, 2026

In the 1980s, early open-source software pioneers challenged the prevailing belief that software would advance only if companies kept tight control over their code. This movement pushed for a transparent ecosystem where developers around the world could study, modify, and improve software. Software developed by the open-source community now supports most of the internet and underlies systems used by the world's largest technology companies, as well as the U.S. military and federal agencies conducting scientific research, cybersecurity, and other critical missions. Open source did more than lower the cost of software; it created a shared foundation of knowledge on which generations of American engineers and entrepreneurs built their institutional sovereignty.

The United States now faces a similar choice with artificial intelligence. Our AI leadership will be judged not by one frontier AI model, but by whether the United States builds a strong, open ecosystem that diffuses into every sector. This is essential for creating opportunities for innovation and prosperity across the country. It requires expanding access to AI, encouraging competition, robust application layers, and giving Americans greater control over the technology they rely on. Open-weight models—AI models that anyone can download, inspect, modify, and run on their own infrastructure—are an important part of that foundation because they make advanced AI more accessible, adaptable, and widely available.

Open weights expand access to the AI economy. Startups, established businesses, universities, and public institutions can build on advanced models without training one from scratch or paying frontier-model prices for every task. Open weights let every organization match the right model to the right job at the right cost, reserving frontier-scale capability for genuine frontier problems and running efficient, specialized models everywhere else. That discipline is what will make AI economically sustainable as its use scales into the billions of everyday tasks. America wins the AI era by diffusing it into the workflows of factories, hospitals, farms, classrooms, and main street businesses.

Open weights also strengthen competition and competition is what keeps the gains of AI broadly shared rather than concentrated in a few hands. By allowing many organizations to build, adapt, and deploy advanced models, open weights create rivalry not only among model developers but across cloud chips,

For my first post, I'm sharing a letter @NVIDIA signed on why open models matter.

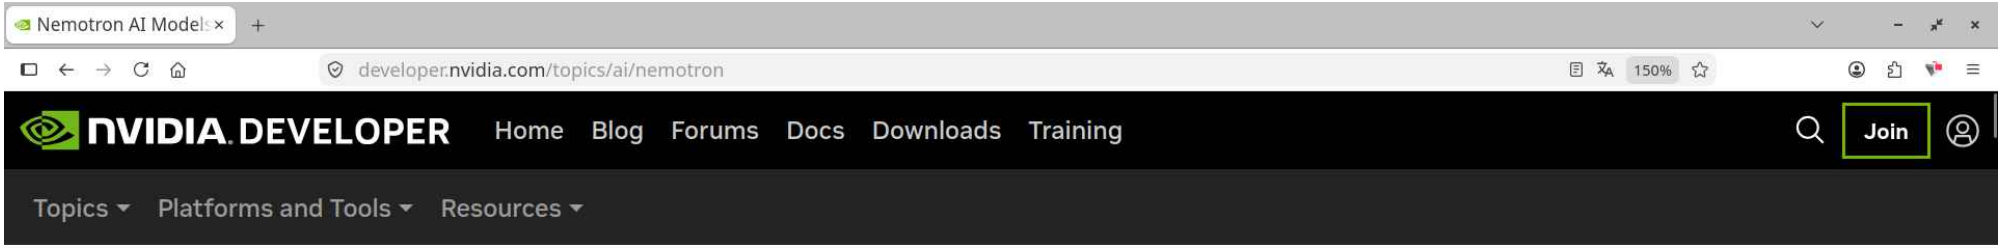

AI will transform every industry, power every company, and be built by every country.

Open models strengthen safety and cybersecurity, accelerate innovation and diffusion, and enable sovereignty.

The world needs both frontier closed models and frontier open models.

本條目存在以下問題，請協助**改善本條目**或在**討論頁**針對議題發表看法。 [展開]

全球互通微波存取（英語：**Worldwide Interoperability for Microwave Access**，縮寫為**WiMAX**）是一項高速無線資料網路標準，主要用在都會網路，由WiMAX論壇提出並於2001年6月成形。它可提供至少一英里無線寬頻接入，作為電纜和DSL之外的選擇。在IEEE 802.16標準的多個版本和選項中做出唯一的選擇，以保證不同廠商產品的互操作性。在802.16實體層的三個變體中，WiMAX選擇了802.16-2004版的256 carrier OFDM，能夠藉由較寬的頻帶以及較遠的傳輸距離，協助電信業者與網際網路服務提供商業者建置無線網路的最後一哩，與主要以短距離區域傳輸為目的之IEEE 802.11通訊協定有著相當大的不同。

WiMAX能提供許多種應用服務，包括最後一哩無線寬頻接入、熱點、行動通訊回程線路以及作為商業用途在企業間的高速連線。通過WiMAX一致性測試的產品都能夠對彼此建立無線連接並傳送網際網路封包資料。在概念上類似WiFi，WiMAX傳送速率更快，傳送範圍距離更大，可以簡單理解為一種「大WiFi」。

WiMAX的升級版WirelessMAN-Advanced（IEEE 802.16m）是兩個4G標準之一。

Open & Intelligent Software for the Radio Access Networks

The O-RAN Software Community (O-RAN SC or OSC) was created in 2018 as a collaboration between the O-RAN ALLIANCE and the Linux Foundation with the mission to support the creation of open software for the RAN, closely aligned with the O-RAN ALLIANCE's open architecture and specifications.

The O-RAN Software Community has successfully jumpstarted open source RAN software, supporting the industry in building open and intelligent RAN.

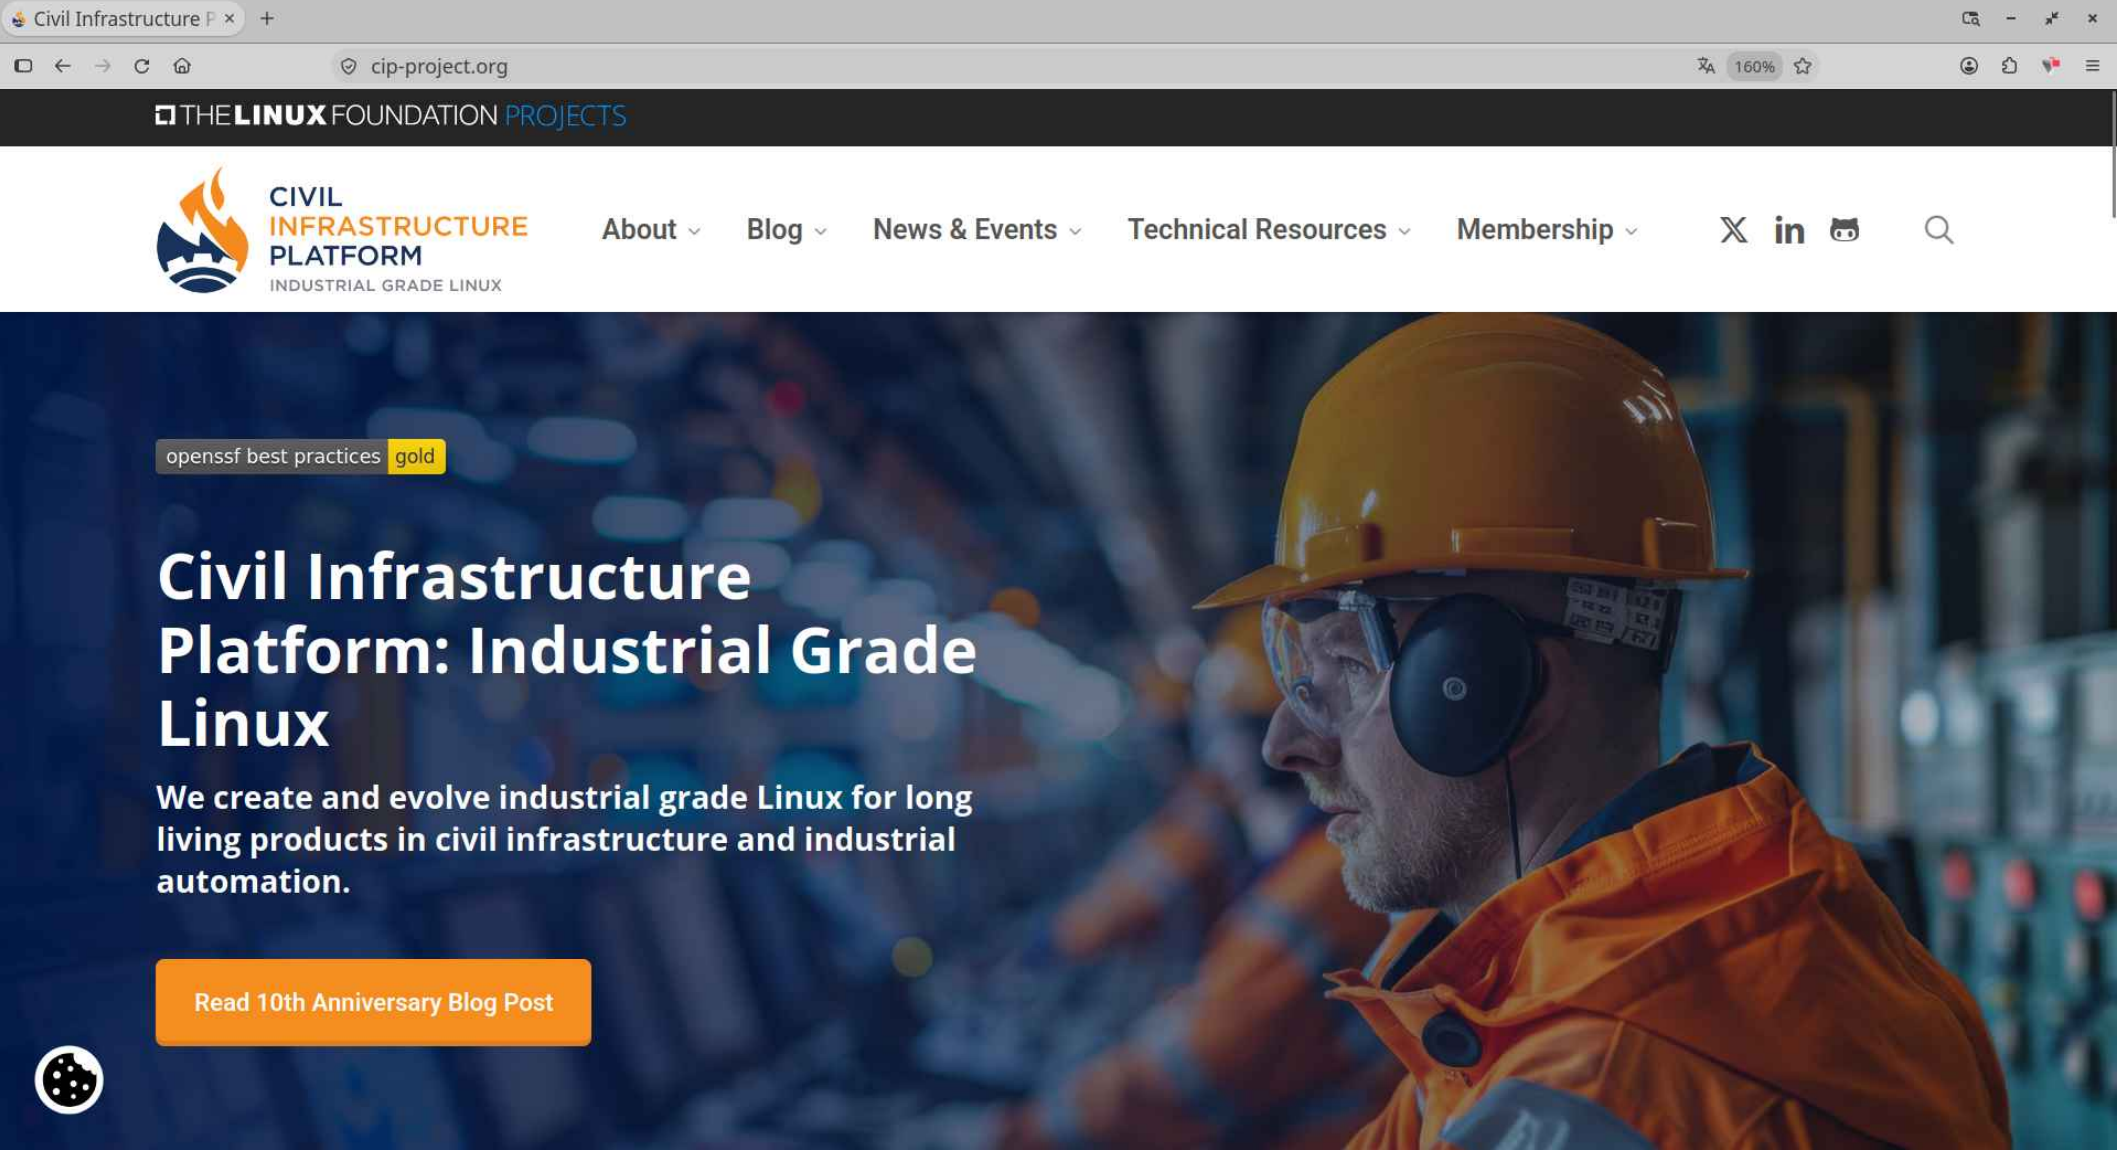

Subsequently, the O-RAN SC is being migrated to the Linux Foundation Networking (LFN). The full integration of O-RAN SC into LFN enables tighter, more efficient, and more streamlined collaboration with fellow LFN projects under a single, unified governance structure.

Read more about the migration in our press release and on the O-RAN Software Community website: o-ran-sc.org.

The LTSI is an ecosystem-wide collaborative project to create and maintain long-term sustainable kernel for the industry that contains additional features such as cutting edge device support as well as security and bug fix patch available in community long-term maintenance kernel.

"Stallman" redirects here. For the flutist, see Robert Stallman. For the speculative fiction author, see Robert Lester Stallman.

Richard Matthew Stallman (/ˈ stɔːlmən/ *STAWL-mən*; born March 16, 1953), also known by his initials, **rms**,[1] is an American free software movement activist and programmer. He campaigns for software to be distributed in such a manner that its users have the freedom to use, study, distribute, and modify that software. Software which ensures these freedoms is termed free software. Stallman launched the GNU Project, founded the Free Software Foundation (FSF) in October 1985,[2] developed the GNU Compiler Collection and GNU Emacs, and wrote all versions of the GNU General Public License.

Stallman launched the GNU Project in September 1983 to write a Unix-like computer operating system composed entirely of free software.[3] With that he also launched the free software movement. He has been the GNU project's lead architect and organizer, and developed a number of pieces of widely used GNU software including among

PUBLICATION

Understanding US export controls with open source projects

DOWNLOAD REPORT

One of the greatest strengths of open source development is how it enables collaboration across the entire world. However, because open source development is a global activity, it necessarily involves making available software across national boundaries. Some countries' export control regulations, such as the United States, may require taking additional steps to ensure that an open source project is satisfying obligations under local regulations.

In July of 2020, The Linux Foundation published a whitepaper on how to address these issues in detail. In 2021, the primary update in the paper is to reflect a change in the US Export Administration Regulations.

同一週，七個主流語言都出了安全修補

2026 年 10 月 19 日 – 22 日 | 日期以各官方公告為準

平台	漏洞／事件	嚴重度
語言與執行環境		
Linux kernel	KSMBD 兩個遠端程式碼執行等 6 份漏洞報告	最高 9.0
Node.js	三個分支、10 個 CVE	最高 High
Python	certifi 移除 emSign 根憑證 + tarfile CVE	Medium
Go	CVE-2026-111943 封鎖 eMudhra 中繼憑證	未評分
Rust	rustls-webpki 等三筆 RustSec、wasmtime	最高 9.9
Java	Oracle CPU：Java SE 55 個修補	最高 7.5
PHP	PHP2Shell	9.2
套件與平台		
LiteLLM	1.107.0 在 PyPI、Docker Hub 被投毒	投毒事件
GitLab	CVE-2026-110264 等 12 個問題	10.0
Chrome	Chrome 156，353 個安全修補	6 個 Critical
Plex	Plex2Shell，已被利用	4.3–7.2
Cisco	14 份公告、34 個 CVE	最高 9.8
Railway	環境變數外洩	平台資安事件

9.0 以上／Critical　7.0–8.9／High　Medium　未評分　事件

The Cyber Resilience Act (CRA) introduces the Single Reporting Platform (SRP) for cybersecurity incident reporting in the EU Digital Single Market.

enisa | CRA SINGLE REPORTING PLATFORM

The Single Reporting Platform (SRP) shall become a technical tool for the reporting of actively exploited vulnerabilities and incidents impacting products with digital elements in the EU Digital Single Market.

Under the Cyber Resilience Act (CRA), manufacturers of products with digital elements are mandated to report actively exploited vulnerabilities and severe incidents having an impact on the security of the products.

As of 11 September 2026 onwards, the SRP will be used by CSIRTs and manufacturers for mandatory reporting and could be used by any natural/legal persons for voluntary reporting.

Throughout 2025 and 2026, ENISA is taking the necessary steps to support the successful implementation of the platform.

https://www.enisa.europa.eu/topics/product-security/single-reporting-platform-srp

開源與 CRA 在立法歷程的衝突與調適

- 產品製造商、販售者擔負資安 - 誰做誰負責
- 純粹開源分享並非產品 - 做開源的不一定直接賺錢
- 然將開源元件商用即課產品責任 - 誰賺誰負責
- 開源有其減輕配套然應透明可及 - 增訂開源除外規定，但也希望開源原生者，能提供一些資安提升上的幫助！

Regulation (EU) 2024/2847 -- CRA, Article 3(48)

(48) ‘free and open-source software’ means software the source code of which is openly shared and which is made available under a free and open-source licence which provides for all rights to make it freely accessible, usable, modifiable and redistributable; → 四大自由

https://eur-lex.europa.eu/eli/reg/2024/2847/oj/eng#art_3

歐盟《 Cyber Resilience Act 》（ CRA ）

1. Open-source Software Steward

(1) 維運資安政策 (2) 配合市場監督 (3) 提供相關文件

(4) 重大資安事件或已遭利用漏洞的通報與公告 (5) 不適用行政罰鍰（ administrative fines ）

2. Open-source Software 資安認證緩衝

- 一般產品 / 重要產品 Class I / 重要產品 Class II / 關鍵產品 Critical
- 數位元素 / 身份存取、密碼管理 / 防入侵、防竄改機制 / 安全盒、智慧閘道總樞
- 資安可自評 / 建立流程標準可自評或第三方評鑑 / 第三方評鑑 / 指定資安認證方案

技術文件開源可及者、 Class I + Class II 可轉為自評

3. 盤點產品線裡哪些 FOSS 已有 Commercial Support(試舉 10 例)

Red Hat （ IBM ） / SUSE / Canonical / GitLab / Percona / Confluent / Elastic / MariaDB plc / Docker / IBM （ HashiCorp ）

4. 保持所使用開源元件或商業授權元件的版本號

5. 資安補正透過溯源 (upstream) 方式實踐

6. 資安修復 (可委外) / 資安通報 (可部份委外) / 資安告知 (應承擔)

EU Cyber Resilience Act Stewardship Guidelines for Red Hat Supported Open Source Projects

PDF download - EU Cyber Resilience Act Stewardship Guidelines for Red Hat Supported Open Source Projects.

Last updated: June 12, 2026

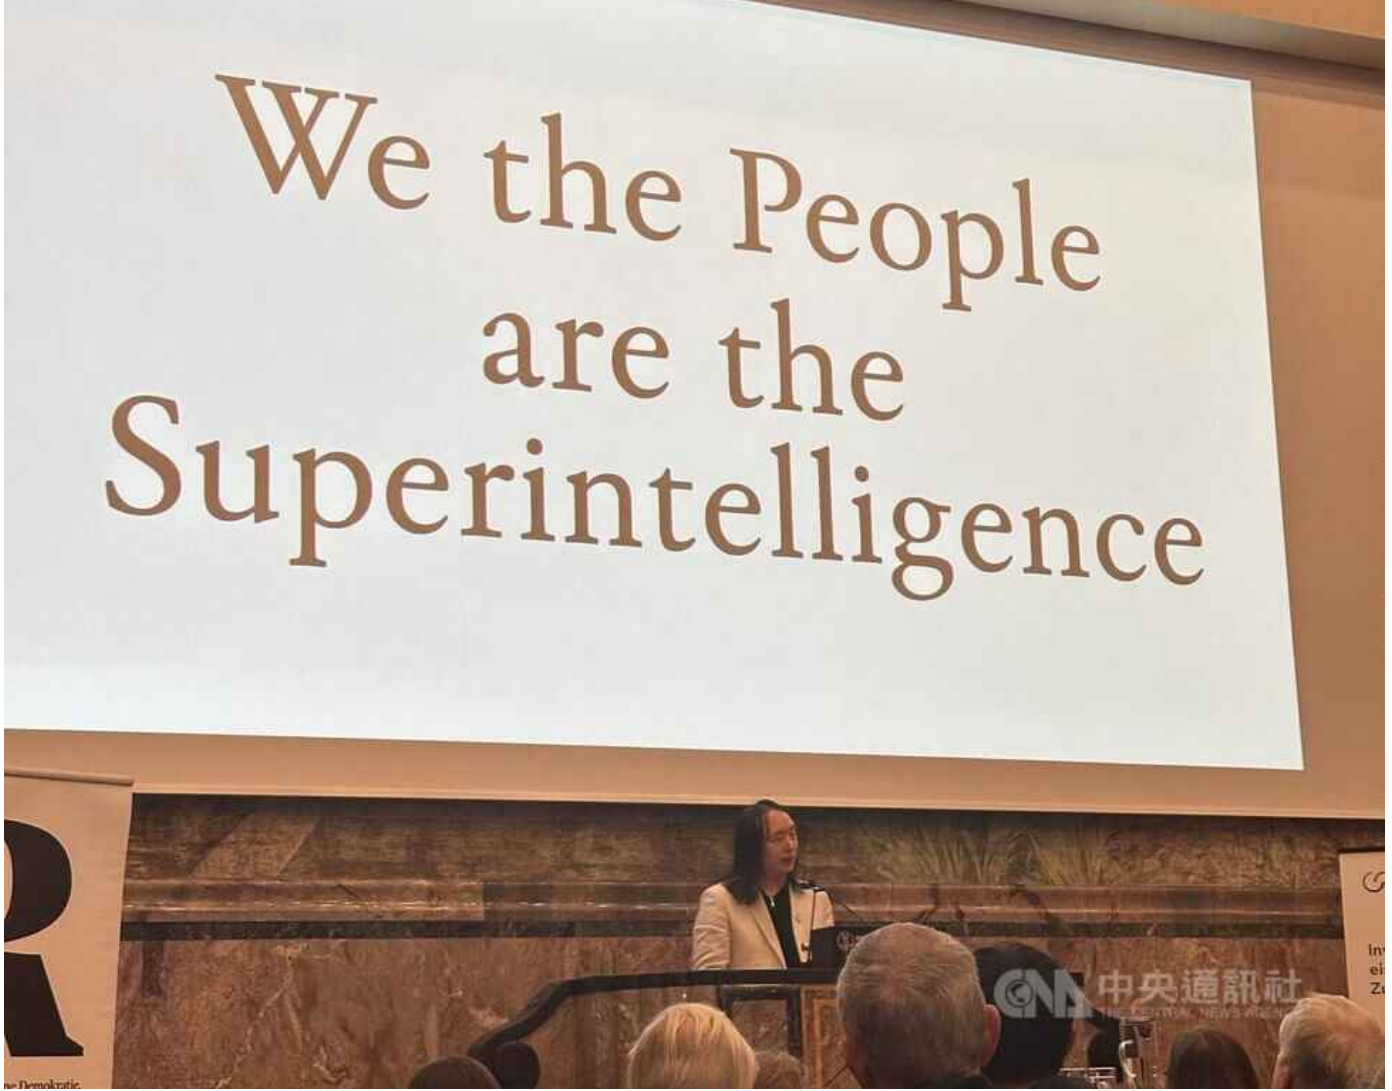

Introduction to the CRA Stewardship

The enactment of the European Union's Cyber Resilience Act (CRA) marks a definitive turning point in the governance of the global software supply chain. For decades, the open source ecosystem has operated on a foundation of voluntary collaboration, best-effort security practices, and a distinct lack of warranty or liability. The CRA fundamentally alters this landscape by introducing statutory cybersecurity requirements for products with digital elements (PDEs) placed on the European market. While the regulation primarily targets commercial manufacturers who monetize software, the interconnected nature of modern software development means that upstream open source projects—specifically those that serve as the foundation for commercial enterprise products—can no longer operate in a regulatory vacuum.

The legislation introduces a new legal actor: the Open Source Software Steward. Read more in the Red Hat blog. This role was specifically architected by EU legislators to recognize the critical infrastructure provided by open source foundations and corporate sponsors, while simultaneously shielding individual contributors and non-commercial projects from the weight of full manufacturer compliance. For the **15 projects** within the scope of this guidance - **Ansible, Fedora, CentOS Stream, Konflux, Quay, StackRox, OKD, crun, hermeto, IIB, Maistra, OSbuild, Pulp, RamaLama, sssd** - Red Hat has formally identified itself as an Open Source Software Steward. This designation is not merely a label; it is an acknowledgment of Red Hat's systematic, sustained support for these communities and its intent to ensure their viability.

The General-Purpose AI Code of Practice

Page Contents

The 3 chapters of the code
Signatories of the code of practice

The code of practice helps industry comply with the AI Act legal obligations on safety, transparency and copyright of general-purpose AI models.

The General-Purpose AI (GPAI) code of practice is a voluntary tool, prepared by independent experts in a multi-stakeholder process, designed to help industry comply with the AI Act's obligations for providers of general-purpose AI models. Read more about the timeline and the drafting process of the code.

The code was published on July 10, 2025. It is complemented by Commission guidelines on key concepts related to general-purpose AI

Chapter V: General-Purpose AI Models −

Section 1: Classification Rules

Article 51:

Article 53: Obligations for providers of general-purpose AI models

Summary +

1. Providers of general-purpose AI models shall:

(a) draw up and keep up-to-date the technical documentation of the model, including its training and testing process and the results of its evaluation, which shall contain, at a minimum, the information set out in Annex XI for the purpose of providing it, upon request, to the AI Office and the national competent authorities;

(b) draw up, keep up-to-date and make available information and documentation to providers of AI systems who intend to integrate the general-purpose AI model into their AI systems. Without prejudice to the need to observe and protect intellectual property rights and confidential business information or trade secrets in accordance with Union and national law, the information and documentation shall:

(i) enable providers of AI systems to have a good understanding of the capabilities and limitations of the general-purpose AI model and to comply with their obligations pursuant to this Regulation; and

(ii) contain, at a minimum, the elements set out in Annex XII;

(c) put in place a policy to comply with Union law on copyright and related rights, and in particular to identify and comply with, including through state-of-the-art technologies, a reservation of rights expressed pursuant to Article 4(3) of Directive (EU) 2019/790;

Chapter III: High-Risk AI Systems +

Chapter IV: Transparency Obligations for Providers and Deployers of Certain AI Systems +

Chapter V: General-Purpose AI Models +

Chapter VI: Measures in Support of Innovation +

Chapter VII: Governance +

Chapter VIII: EU Database for High-Risk AI Systems +

(b) the acceptable use policies applicable;

(c) the date of release and methods of distribution;

(d) how the model interacts, or can be used to interact, with hardware or software that is not part of the model itself, where applicable;

(e) the versions of relevant software related to the use of the general-purpose AI model, where applicable;

(f) the architecture and number of parameters;

(g) the modality (e.g. text, image) and format of inputs and outputs;

(h) the licence for the model.

2. A description of the elements of the model and of the process for its development, including:

(a) the technical means (e.g. instructions for use, infrastructure, tools) required for the general-purpose AI model to be integrated into AI systems;

(b) the modality (e.g. text, image, etc.) and format of the inputs and outputs and their maximum size (e.g. context window length, etc.);

(c) information on the data used for training, testing and validation, where applicable, including the type and provenance of data and curation methodologies.

Thanks! 謝謝！
